PROFILE

I am a final-year Computer Science student and agency founder who builds full-stack software for real clients and leads teams to deliver it. I care about clean data models, readable code and getting things into production. I'm looking for an engineering team where I can work on larger systems and learn from people better than me.

EDUCATION

Eduvos | Midrand. GP **Feb 2024 – Nov 2026**
B.S in Computer Science (NQF L7)
Average: *83.6% / 3.9 GPA*

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, C#, Python, PHP, C++, C
Frameworks: Next.js, React, .NET
Databases: PostgreSQL, MySQL, Supabase, MongoDB
Tools & Practices: Git, GitHub, CI/CD, Agile/Scrum, unit testing, debugging, code review

WORK EXPERIENCE

Founder & Lead Developer, Monostudios | *Self-employed* ***Jan 2025 - Present***

- Designed, coded, tested and deployed full-stack web applications end to end for paying clients, covering database schema, scalable microservice backend architecture, and frontend implementation
- Optimized site performance, UX flows, and conversion-focused design.
- Wrote technical specifications and managed project scope, requirements, and delivery timelines independently from first client contact through launch.
- Maintained and debugged production applications, applying version control (Git) and consistent coding standards across projects.

NSM Devs | *contract web developer* ***Feb 2026***

- Designed, coded, tested and deployed full-stack web applications end to end for paying clients, covering database schema, scalable microservice backend architecture, and frontend implementation

PROJECTS

- **Thipe Youth Golf Academy Platform (2026):**
  - Project manager and lead developer for a 5-person student team delivering a golf academy management platform, owning the design system and database architecture.
  - Ran Agile sprints, task allocation and code review across the team.
- **NeuraCore (2025) |** *Eduvos HackJam***:**
  - Led development of a multi-vendor idea hub connecting students, lecturers, and recruiters, enabling collaborative technical projects, academic oversight, and a recruiter pipeline for intern discovery
- **KITH (2026)**:
  - Built a full-stack PHP/MySQL C2C marketplace for the South African market with secure PayFast transaction handling, seller/admin dashboards, and a custom front-end design system

LEADERSHIP EXPERIENCE

Class Representative (3 terms): Represent a cohort of 24 students, escalating feedback and concerns to lecturers and coordinating resolutions.
